Summary

I am a positive, creative and self-taught person who is passionate about contributing assistance with my knowledge and skills, as well as gaining experience for my professional training and contributing to society.

School Projects

SEPTEMBER 2016 — JULY 2019

- I developed an "Online Exam Emulator" system with technologies such as PHP and JavaScript.
- I developed an E-commerce system similar to Mercado Libre as a school project, with PHP Laravel and JavaScript.

Intern, at Tecnocible

MARCH 2018 — AUGUST 2018

- I did my TSU internship at the company Tecnocible for 4 months. I had the opportunity to develop a project that solved the problem of a newspaper company in the city of Colima. I made use of technologies such as PHP, MySQL, JQuery, JavaScript and Bootstrap.
- In this company, we apply the agile Scrum methodology for project delivery.

Project manager, Magsan Motors

OCTOBER 2018 — NOVEMBER 2019

- In the company MAGSAN MOTORS, I worked 9 months as project leader, I also participated in the development of an operating system of an electric car, using technologies such as Java and different types of sensors, in this project also Scrum methodology was implemented.

Developer, BrightCoders Academy

JANUARY 2020 — MAY 2020

- I participated in the BrightCoders program working on multiple projects using technologies such as Ruby on Rails JavaScript, jQuery, Sass, Git, AWS, Scrum, Sidekiq, PostgreSQL, Redis as well as testing with Rspec and Capybara.

Developer, Ectotec

SEPTEMBER 2020 — NOVEMBER 2020

- In this company I was a Rails Developer using technologies such as Jasper soft and MYSQL as a database manager in this company I had the opportunity to work debugging errors of a school system.
